

Creeping Bentgrasses

Penncross

Penncross

The standard for creeping bentgrass since 1955 and still the most specified bentgrass for golf courses. Penncross recovers quickly from injury and divots. Has good heat and wear tolerance. First choice of golf course architects and superintendents.

Penneagle

Penneagle

The top performing fairway bentgrass. Penneagle germinates quickly. Penneagle's upright, dense growth habit helps crowd out Poa annua. Penneagle is salt tolerant.

PennLinks

PennLinks

Developed for grainless greens, PennLinks became an instant success when introduced in 1987. PennLinks has upright, dense growth for true putting. PennLinks has fine texture and heat tolerance.

Pennway

Pennway

Economical fairway and winter overseeding blend of 15% Penncross, 50% Penneagle, and 35% quality creeping bentgrass. Certified Pennway contains 35% Penncross, 15% PennLinks, and 50% Penneagle for a high quality blend with genetic diversity.
