

With the drought, our Tempest stands tough...

Attention Sports Turf Managers: Top Ten Rating for traffic tolerance in 2003!

TEMPEST tall fescue is tough for turf. Recent tests show TEMPEST to be a great performer in California turf trials. It performs admirably in other areas of the country as well. In Virginia, they recently had five years of record drought. TEMPEST was planted in the fall of 2001 in the NTEP turf trials. It rated in the top ten of over one hundred sixty entries in drought tolerance and wilting in Blacksburg. TEMPEST survived and thrived in some dry and tough times in 2002.

TEMPEST has excellent drought and heat tolerance, germinates rapidly, and fills in quickly to provide an excellent lawn area for homes, parks, athletic fields. It thrives with shorter vigorous mowing, as low as an inch.

In recent studies conducted, TEMPEST is among the leading tall fescues in quality judged by dark genetic color, speed of germination, drought tolerance and mowing quality. TEMPEST stands tough...

Whether you're in California, Maryland, Virginia, Iowa, Illinois, New York or parts in between, TEMPEST is among the better performing turf type tall fescues available today. Full turf trials available on request.
